

6.005 Group Project: Music Player Team Contract

Goals:

- It is acceptable for a member to do more work than the others in order for the team to get an A

Meeting Norms:

- Meetings held in H32 in Macgregor
- In-class time will be used work on the project

Work Norms:

- At most 20 hours /wk necessary to complete this project.
- Group will create partition for tests. Then, the partition will be divided among the group members. Each group member will write tests that encompass his/her given partitions.
- Task responsibilities will be assigned on Discord App
- Code written by group members will be reviewed by other group members in person
- If a team member thinks that another member's code is not good enough for the project, a discussion between those group members will be had to resolve this code. If a disagreement is still present, then the member who thinks the code is not good enough is allowed to re-write the other member's code.
- Comments and commit messages will be grammatically correct.

Decision Making:

- A majority vote is necessary to make a decision ($\frac{2}{3}$ vote)
- Basic communication: tell group members what you are up to (post in Discord)
